0007A	OPTIONAL – FFP – Year 1 - Licenses for Task C – TSO Training Licenses - licensing solution to support 44,000 users of the METT-Advanced Online training solution (licenses shall be valid for no less than a one year period and licenses shall be in TSA's name.) ENTERPRISE LICENSE, TWO YEAR ACCESS	1	Lot	(b)(4)	
0007B	OPTIONAL – FFP – Year 1 - Licenses for Task C – TSO Training Licenses - licensing solution to support 44,000 users of the METT-Advanced Online training solution (licenses shall be valid for no less than a one year period and licenses shall be in TSA's name.) INDIVIDUAL USER LICENSES, TWO YEAR LICENSE TERMS	1	Lot	(b)(4)	
0008	OPTIONAL - FFP – Year 1 - Licenses for Task A – licensing solution to support 44,000 users of the Microexpression Training Course (Original) training solution (licenses shall be valid for no less than a one year period and licenses shall be in TSA's name.) INDIVIDUAL USER LICENSES, UNLIMITED ACCESS	1	Lot	(b)(4)	
0009	OPTIONAL – T&M - Task D – Curriculum Development for TSA Micro-Facial Training*	1	Job	(b)(4)	
Phase III - Period of Performance – December 15, 2010 – March 14, 2011					
0010	T&M – Task E - BDO Training Licenses/ OLC Integration*	1	Job	(b)(4)	
0011	FFP – Year 1 - Licenses for Task E – BDO Training Licenses - licensing solution to support 3,100 users of the MiX2 and MiX2 Additional training solution (licenses shall be valid for no less than a one year period and licenses shall be in TSA's name.) INDIVIDUAL USER LICENSES, UNLIMITED ACCESS	1	Lot	(b)(4)	

*Labor rates applied to these CLINs shall be based on Attachment 20 of the IDIQ contract.

**Contractor shall bill CLINs 0001, 0001A, 0001b, 0002, 0002A, and 0002B at the sub-CLIN level (as separate CLINs with separate periods of performance)...

B.2 Associated Labor Categories

The following table defines the labor categories that can be used under each T&M CLIN:

CLIN NO	LABOR CATEGORIES
0006	#58 - Senior information Technology Specialist #72 - Subject Matter Expert (SME)
0009	#01 - Senior Instructional Technologist/ Designer #02 - Instruction Technologist/ Designer #03 - Junior Instructional Technologies/ Designer #04 - Senior Curriculum Developer #05 - Classroom Curriculum Developer #06 - Junior Classroom Curriculum Developer #27 - Graphics #73 - Security Training Analyst #75 - Technical Writer/Editor
0010	#58 - Senior Information Technology Specialist #72 - Subject Matter Expert (SME)

B.3 Conditions and Assumptions

The prices above are based on the conditions and assumptions stated in Attachment B that have been accepted by the Government and incorporated into this Task Order.

B.4 Accepted Proposal

The technical proposal titled SST900 TO 08 Tech Approach v2 2nd Submission, dated 08/30/2010 and the price proposal titled SST900 TO 08 Vol 2 Price 2nd Submission, dated 08/30/2010 is hereby accepted.

(End of Section B)

SECTION C – STATEMENT OF WORK

1. Background

The Transportation Security Administration's (TSA's) Screening of Passengers by Observation Techniques (SPOT) program is a behavior observation and analysis program in which personnel are trained to identify anomalous behaviors that deviate from an established environmental baseline. SPOT is a program designed for passive observation by TSA personnel, known as Behavior Detection Officers (BDOs), who typically observe in front of the security checkpoint, to identify potentially high-risk passengers exhibiting anomalous behaviors that deviate from an established environmental baseline, to include behavior cues associated with the fear of discovery.

Each of the behaviors the BDOs are trained to observe is garnered from both the scientific and law enforcement community. Beginning in fiscal year (FY) 2009, TSA introduced the Additional Behavior Detection Training course (ABDT) as an additional training tool for BDOs. ABDT is a two day class emphasizing non-verbal behavioral detection. This class teaches BDOs how to recognize possible red flags in terms of deception that may manifest itself in micro-expressions and other non-verbal gross motor behavior movements. The main focus is with micro-expression detection during the Casual Conversation portion of the SPOT process. The training also helps direct questions asked of the passenger in order to resolve the situation. The expressions emphasized in the course are universal, meaning that it is culturally independent.

Ideally, the behavior detection capability should be implemented for all TSA staff and especially Transportation Security Officers (TSOs), but cognitive demands of the skill severely limit its applications when personnel have other assigned duties they must concentrate on (e.g. physical screening or threat image recognition). As a result, TSA is seeking training for Micro-Facial recognition for TSOs, a smaller subset of the overall behavior detection capability, which is less cognitively demanding than the entire behavior detection capability that is performed by BDOs. With adequate training, Micro-Facial recognition can be implemented while other screening duties are being performed by TSOs or when other cognitive demands are eased. TSA is also looking to procure additional Micro-Facial training for Behavior Detection Officers to complement initial Micro-Facial training and support recurrent Micro-Facial training requirements.

2. Objective

This initiative will provide BDOs and TSOs with continual on-line training in Micro-Facial expression. The objective of the training is to provide BDOs and TSOs with an additional detection tool that can help identify information indicating a potential security threat through recognition of deceptive behaviors. This information would allow TSOs to target their screening efforts more precisely through more directed searches or by requesting the assistance of a BDO to further understand the anomalous behaviors. Because behavior detection focuses on people rather than threat objects which can and have changed to exploit vulnerabilities in our screening system—the capability will better enable the TSA screening workforce to identify existing and novel security threats introduced by a dynamic, adaptive adversary.

The Micro-Facial training for TSOs is in no way intended to replace or diminish the roll of Behavior Detection Officers. Because of the cognitive demands, TSOs cannot implement the full range of the behavior detection, as in the Screening Passengers by Observation Technique (SPOT) process while performing other screening duties. BDOs, unencumbered by these other screening duties, will continue to have a crucial role in detecting mal-intent by being able to employ the full range of behavior detection tools across a wider scope of security operations.

3. Scope of Work

TSA requires scientifically validated, web-based Micro-Facial recognition training that can be completed in approximately 20-60 minute sessions. Through market research TSA has identified two Commercial- Off-The-Shelf (COTS) products that meet TSA's requirements, will minimize development efforts and significantly reduce Operations and Maintenance (O&M) costs. The two Micro-Facial training products complement one another for training purposes, as one product primarily focuses on frontal facial views, whereas the second product adds profiles views to the frontal views. An additional benefit of using both products is a greater number of images for TSOs/BDOs to view. Although TSA's market research revealed only two vendors which produce Micro Facial training meeting TSA requirements, the contractor is encouraged to offer other potential training solutions if such solutions are discovered. A detailed description of the two suggested products, sub-products and TSA's training requirements are provided in Appendix A.

TSA requires a multi-phased procurement of the Micro-Facial recognition training as described in the following requirements.

Task A: Initial Pilot Phase

The Contractor shall deliver licensing solutions to support 4100 users of the METT-Advanced Online, and 4100 users of the Microexpression Training Course (Original) within 30 business days of award. Once procured, any / all licensing solutions shall be recorded in TSA's name. Licenses shall include any updates and/or revisions made by the vendor(s) to the COTS products for the duration of license agreements. TSA will review each product, perform operational pilot testing for TSOs, and conduct training pilots for BDOs. Results from operational and training pilots will assist TSA in determining which of the following tasks will be awarded.

Each training product shall have the ability to track pass/fail and individual scores. The Contractor shall track training effectiveness based on individual scores and other factors. In addition, the Contractor shall provide summary level pass/fail and score reporting for each pilot group to assist with ascertaining training effectiveness. The contractor shall ensure all participant completion information is entered into TSA's Online Learning Center (OLC). Options include, but are not limited to online (web access) and/or offline (CD/DVD) support during each of the pilots.

Task B: OLC Integration

The Contractor shall support IT testing with the goal to integrate the training products for use on or via TSA's Online Learning Center (OLC). Although hosting web-based training on the OLC is preferred, an interim solution for hosting on a vendor's IT system may be acceptable as long as DHS's privacy and security policies are met. In either case, participants must be able to launch the training via the OLC and all completion/grade data must reside on the OLC. The contractor shall work with training vendors and the TSA OLC team to determine the most efficient and cost effective approach for implementation. The OLC hosting requirement is not necessarily applicable during the TSO and BDO pilot stages, but is preferred.

A Project Management Plan (PMP) shall be prepared by the contractor within 10 business days following the kickoff meeting for Task B. The PMP shall outline the contractor's detailed plans for executing Task B.

Task C: OPTIONAL TSO Training Licenses

Assuming TSO Micro-Facial operational pilots are successful for at least one training product, the next phase of this task order effort is acquiring TSO Training Licenses. The government will decide which of the two training products will be selected. The Contractor shall deliver licensing solutions

to support 44,000 additional users. If more than one product is successful during pilot testing, the contractor shall provide licensing solutions for each successful product. All licenses shall be in TSA's name. Licenses shall include any updates and/or revisions made by the vendor(s) to the COTS products for the duration of license agreements.

Task D: OPTIONAL Curriculum Development for TSO Micro-Facial Training

TSOs will gain a better understanding of the traveling public because they will have the skill to observe and react appropriately to certain situations with individuals based on emotional awareness. In addition, TSOs will use the Micro-Facial recognition skill to determine if additional screening is appropriate for an individual.

TSA will develop policy and operational procedures for TSOs to use the Micro-Facial skill effectively. The contractor shall develop approximately one (1) hour of Interactive Multimedia Instruction (IMI) level 2 curriculum to support TSA policies and operational procedures to meet the following goals;

- Provide training to apply Micro-Facial recognition skills in TSA's operational environment
- Provide training on what to do and not do based upon observation of Micro-Facial expressions (i.e. resolution)

A Project Management Plan shall be prepared by the contractor within 10 business days following Task D kick-off meeting. The PMP will outline the contractor's detailed plans for executing the task.

Task E: OPTIONAL BDO Training Licenses / OLC Integration ...

The Contractor shall deliver licensing solutions to support 3100 users of the "Frontal, Profile, and ¾ Views (MiX2)" and "MiX2 Additional" training courses within 30 business days of award. All licenses shall be in TSA's name. Licenses shall include any updates and/or revisions made by the vendor(s) to the COTS products for the duration of license agreements.

The Contractor shall integrate the MiX2 and MiX2 Additional training courses for use on or via TSA's Online Learning Center (OLC). Although hosting web-based training on the OLC is preferred, hosting on a vendor's IT system may be acceptable as long as DHS's privacy and security policies are met. In either case, participants must be able to launch the training via the OLC and all completion/grade data must reside on the OLC. The contractor shall work with the training vendors and the TSA OLC team to determine the most efficient and cost effective approach for implementation.

A Project Management Plan (PMP) shall be prepared by the contractor within 10 business days following the kickoff meeting for Task E. The PMP shall outline the contractor's detailed plans for executing Task E.

4. Quality Assurance

The Contractor shall ensure that all Task Order performance objectives and deliverables are of the highest achievable quality; to promote continuous improvement; and ensure best practices are employed at all times.

5. Government Furnished Equipment, Information, and Property (GFE/GFI/GFP)

- The government will provide applicable Government Furnished Information (GFI) including user information necessary for the provision of training, recording and the reporting of performance feedback. The contractor shall provide GFI Inventory Report to the COTR in the weekly report;
- The government will provide applicable policies and operational procedures once created;

- All GFE shall be tracked and reported in accordance with the requirements of the base contract (HSTS01-09-D-OSO900);
- The Contractor shall utilize Government Furnished Equipment (GFE) for all Tasks within the SOW. These systems shall be configured the same as fielded units operating at the TSA specification for U.S. airports unless otherwise agreed upon by the government;
- The Contractor may be required to purchase equipment if GFE is not available. A separate modification will be issued for these purchases. All contractor acquired equipment subsequently becomes GFE as defined by the terms of the contract;
- TSA will supply property tags in support of this effort. Property records shall be managed by the contractor and provided on a monthly basis to TSA property for bulk upload into the TSA Sunflower system in accordance with TSA Management Directive No 200.57 “Personal Property Management”;

6. IT Requirements

IT Security requirements shall be in accordance with the requirements of the base contract (HSTS01-09-D-OSO900).

The contractor shall comply with the following DHS Enterprise Architecture Compliance Clause.

DHS Enterprise Architecture Compliance

All solutions and services shall meet DHS Enterprise Architecture policies, standards, and procedures. Specifically, the contractor shall comply with the following Homeland Security Enterprise Architecture (HLS EA) requirements:

- All developed solutions and requirements shall be compliant with the HLS EA
- All IT hardware and/or software shall be compliant with the HLS EA Technical Reference Model (TRM) Standards and Products Profile
- Description information for all data assets, information exchanges and data standards, whether adopted or developed, shall be submitted to the Enterprise Data Management Office (EDMO) for review and insertion into the DHS Data Reference Model and Enterprise Architecture Information Repository
- In compliance with OMB mandates, all network hardware shall be IPv6 compatible without modification, upgrade, or replacement

7. Travel

The Contractor will be required to support Domestic Travel for this effort. Travel locations are CVG, PIT and TPA to support pilots, meetings with vendors and/or curriculum development requirements defined within this SOW. The government anticipates three (3) trips may be necessary and five (5) days in duration (1 trip / 5 days per site). Reimbursement of travel will be in accordance with the Terms and Conditions of the IDIQ Contract.

8. Deliverables and Schedules**Task A and B Deliverables**

Number	Deliverable	Due Date	Recipient	Government Review

SECTION D – PACKING, PACKAGING, AND MARKING

D.1 Clauses of the IDIQ Contract HSTS01-09-D-OSO900 shall apply to this task order.

SECTION E - INSPECTION AND ACCEPTANCE

E.1 Clauses of the IDIQ Contract HSTS01-09-D-OSO900 shall apply to this task order.

SECTION F - DELIVERY

F.1 Delivery Requirements

All materials ordered under this task order shall be shipped "F.O.B. Destination".

F.2 Period of Performance

CLIN	PERIOD OF PERFORMANCE
0001	September 15, 2010 – December 14, 2010.
0001A	EDOE – 3 months.
0001B	December 15, 2010 – March 14, 2011.
0002	September 15, 2010 – December 14, 2010.
0002A	EDOE – 3 months
0002B	December 15, 2010 – March 14, 2011.
0003-0006	September 15, 2010 – December 14, 2010.
0007-0009	EDOE – 3 Months.
0010-0011	December 15, 2010 – March 14, 2011.

The period of performance for this task order can go no later than June 14, 2011.

F.3 Delivery Schedules/ Deliverables/ Delivery Information

See Section C for list of deliverables and deliverable schedule.

SECTION G - CONTRACT ADMINISTRATION DATA

G.1 Clauses of the IDIQ Contract HSTS01-09-D-OSO900 shall apply to this task order.

G.2 SUBMISSION OF INVOICES - Commercial

(a) Background: The Transportation Security Administration (TSA) partners with the United States Coast Guard Finance Center for financial services in support of TSA operations, including the payment of contractor invoices. Therefore, all contractor invoices must be submitted to, and will be paid by, the U.S. Coast Guard Finance Center (FinCen).

(b) Invoice Submission Method: Invoices may be submitted via facsimile, U.S. Mail, or email. Contractors shall utilize ONLY ONE method per invoice submission. The submission information for each of the methods is as follows in order of preference:

1) Facsimile number is: 757-413-7314

The facsimile number listed above shall be used by contractors for ORIGINAL invoice submission only. If facsimile submission is utilized, contractors shall not submit hard copies of invoices via the U.S. mail. It is the responsibility of the contractor to verify that

invoices are received, regardless of the method of submission used. Contractors may inquire regarding the receipt of invoices by contacting the U.S. Coast Guard Finance Center via the methods listed in subparagraph (e) of this clause.

2) U.S. Mail:

United States Coast Guard Finance Center
TSA Commercial Invoices
P.O. Box 4111
Chesapeake, VA 23327-4111

3) Email Invoices:

FIN-SMB-TSAInvoices@uscg.mil or www.fincen.uscg.mil

(c) Invoice Process: Upon receipt of contractor invoices, FinCen will electronically route invoices to the appropriate TSA Contracting Officer's Technical Representative and/or Contracting Officer for review and approval. Upon approval, the TSA will electronically route the invoices back to FinCen. Upon receipt of certified invoices from a Authorized Certifying Official, FinCen will initiate payment of the invoices.

(d) Payment Status: Contractors may inquire on the payment status of an invoice by any of the following means:

(1) Via the internet: <https://www.fincen.uscg.mil>

Contacting the FinCen Customer Service Section via telephone at 1-800-564-5504 or (757) 523-6940 (Voice Option #1). The hours of operation for the Customer Service line are 8:00 AM to 5:00 PM Eastern Time, Monday through Friday. However, the Customer Service line has a voice-mail feature that is available 24 hours per day, 7 days per week.

(2) Via the Payment Inquiry Form: <https://www.fincen.uscg.mil/secure/payment.htm>

(e) Invoice Elements: Invoices will automatically be rejected if the information required in subparagraph (a)(2) of the Prompt Payment Clause, contained in this Section of the Contract, including EFT banking information, Taxpayer Identification Number (TIN), and DUNS number are not included in the invoice. All invoices must clearly correlate invoiced amounts to the corresponding contract line item number and funding citation.

(f) Supplemental Invoice Documentation: Contractors shall submit all supplemental invoice documentation (e.g. copies of certified time sheets (as applicable), subcontractor invoices, receipts, signed receiving reports, travel vouchers, etc) necessary to approve an invoice along with the original invoice. The Contractor invoice shall contain the information stated in the Prompt Payment Clause in order to be received and processed by FinCen. Invoice charges shall be billed per appropriate Contract Line item Number (CLIN), period of performance and obligated funding. Unless otherwise authorized by fiscal law, funding from one CLIN may not be utilized to offset charges on another CLIN, specifically if it is different accounting and appropriation data. Supplemental invoice documentation required for review and approval of invoices may, at the written

direction of the Contracting Officer, be submitted directly to either the Contracting Officer, or the Contracting Officer's Technical Representative.

(g). Frequency of invoice submission: Monthly

G.3 Supplemental Invoice Documentation

In accordance with Section G.4 of the IDIQ contract, Contractor shall provide with the invoice submitted to FINCEN, backup documentation that includes finalized quotes/proposals for ODCs used in performance of this Task Order.

SECTION I – CONTRACT CLAUSES, TERMS, AND CONDITIONS

I.1 Clauses of the IDIQ Contract HSTS01-09-D-OSO900 shall apply to this task order.

(End of Section I)

SECTION J – CONTRACT DOCUMENTS, EXHIBITS, OR ATTACHMENTS

J.1 Contract Documents

ATTACHMENT NO.	TITLE/ DESCRIPTION	DATE
A	Description of Products	N/A
B	Conditions and Assumptions	09/15/2010

(End of Section J)

Appendix A

TSA Training Requirements:

Requirements

- Product(s) will provide Micro Facial recognition training based on scientifically validated research to detect facial expressions of emotion.
- The training shall be available in small, discrete sessions which can be reviewed in approximately 20-60 minutes intervals
- The training module shall track the effectiveness of the training and the training's impact by recording scores of individual achievement levels
 - Pre- and Post-tests are desired
- The training shall have the ability to be delivered via the in web for up to 50,000 users
- The training shall be automatically updated as changes are implemented

Description of Commercial Off The Shelf (COTS) Products:

Product 1; Paul Ekman Group

- <http://face.paulekman.com/products.aspx>
- Paul Ekman group has a series of online training tools for micro-facial expressions based on 40 years of research into emotions and deception
- **Training Tools**
 - **METT-Advanced Online**
 - This training is meant for those whose work requires them to evaluate truthfulness and detect deception - such as police and security personnel, and those in sales, education, and medical professions
 - METT Advanced will improve your accuracy, as it has more practice and training items-and a review section for additional training than the original version. It will take about one hour

Product 2; Humintell

- <http://www.humintell.com/>
- MiX microexpression and subtle training series have been scientifically proven and teaches how to recognize facial expressions of emotion that happen when someone tries to conceal or repress their emotion
- **Unique Features**
 - Users or admin can set the target expressions to be presented at any speed between 1. to 5000 msec. allowing for training of micro OR macro expressions.
 - Response alternatives can be altered to include any emotion words
 - All courses include faces of males and females from multiple ethnicities and ages
 - Courses can be customized to include only faces of a specific ethnicity

- **Training Tools**
 - **Microexpression Training Course (Original) (Task A)**
 - MiX training offers users a more comprehensive learning tool to detect microexpressions. Complete with expressions of males and females from six different ethnic groups, MiX can improve your ability to recognize hidden signs of emotions in less than one hour of training
 - The MiX training tool consists of a baseline test, 16 instructional videos, 4 practice arrays and a post test
 - **Frontal, Profile, and ¾ Views Training Course (MiX2) (Task E)**
 - Real human interactions involve moving heads and bodies, and experts need to be able to detect micro-expressions from multiple angles. This course provides users with the most advanced training on micro-expression recognition, presenting frontal, ¾, and profile views of 84 individuals who contribute two expressions each
 - The MiX 2 training tool consists of a baseline test, 8 instructional videos, a practice test with 42 images, a review section and a post test. All of the tests contain images from all angles
 - **MiX2 Additional (Task E)**
 - MiX 2 TM-Additional Training Tool allows users to practice with images from exclusively the profile view. The training tool contains 84 color images of people representing various ethnicities, ages and genders. You will not receive a certification with this training and there are no instructional videos. It is meant exclusively for additional practice

Conditions and Assumptions for HSTS01-10-J-OOP112 (TO8) – Micro-Facial Training

The prices in this Task Order are based on the following conditions and assumptions that have been accepted by the Government.

Task A

1. LM assumes functional internet connectivity will be available at all pilot locations for all scheduled participants.
2. LM assumes that the TSA Program Office will handle all field communications directly with operational tryout/pilot participants.

Task D

1. 1.5.2.1 LM assumes the developed IMI will be no more than one (1) hour in length, and SCORM conformant.
2. LM assumes receipt, as GFI, all applicable TSA policies and operational procedures at the Task D kick-off meeting.
3. LM assumes that all TSA comments will be received within 5 business days of delivery for each development product. LM assumes no more than two (2) review cycles for each development product.

NAME OF OFFEROR OR CONTRACTOR

Lockheed Martin Services Incorporated

ITEM NO. (A)	SUPPLIES/SERVICES (B)	QUANTITY (C)	UNIT (D)	UNIT PRICE (E)	AMOUNT (F)
	Add Item 00002C as follows:				
00002C	CLIN 0002C - ODC Reimbursable - NTE ODCs for Task F PCP - March 15, 2011 - August 15, 2011	1	CB	272.79	272.79
	Add Item 00012 as follows:				
00012	CLIN 0012 - FFP - Labor for Task F within revised SCW, dated 02/16/2011. PCP - March 15, 2011 - August 15, 2011	1	CB	(b)(4)	

The purpose of this modification is to:

1. Incorporate new work into this Task Order's Statement of Work. Therefore, Section C of the Task Order is hereby removed and replaced with Attachment C – Revised Statement of Work, 02/16/2011, which includes new requirements described in Task F.
2. Incorporate and fund the following CLINs into Section B to reflect the new work that has been added into this task order:
 - CLIN 0001c – Firm-fixed price to perform Project Management for Task F as defined in the revised SOW in the amount of (b)(4)
 - CLIN 0002c - Not-to-Exceed ceiling amount for anticipated ODCs for Task F work as defined in the revised SOW in the amount of \$272.79.
 - CLIN 0002d - Not-to-Exceed ceiling amount for anticipated travel for Task F work as defined in the revised SOW in the amount of \$9,352.12.
 - CLIN 00012 - Firm-fixed price to perform Task F as defined in the revised SOW in the amount of (b)(4)
3. Incorporate the following assumptions into Attachment B – Conditions and Assumptions for HSTS01-10-J-OOP112 (TO8) – Micro-Facial Training:

Task F

1. LM assumes functional internet connectivity will be available at all pilot locations for all scheduled participants.
 2. LM assumes that the TSA Program Office will handle all field communications directly with operational tryout/pilot participants.
4. Update Section B.1 as follows:

B.1 Contract Line Items, Descriptions

**Contractor shall bill CLINs 0001, 0001A, 0001b, 0002, 0002A, and 0002B at the sub-CLIN level (as separate CLINs with separate periods of performance).

SECTION C – STATEMENT OF WORK

1. Background

The Transportation Security Administration's (TSA's) Screening of Passengers by Observation Techniques (SPOT) program is a behavior observation and analysis program in which personnel are trained to identify anomalous behaviors that deviate from an established environmental baseline. SPOT is a program designed for passive observation by TSA personnel, known as Behavior Detection Officers (BDOs), who typically observe in front of the security checkpoint, to identify potentially high-risk passengers exhibiting anomalous behaviors that deviate from an established environmental baseline, to include behavior cues associated with the fear of discovery.

Each of the behaviors the BDOs are trained to observe is garnered from both the scientific and law enforcement community. Beginning in fiscal year (FY) 2009, TSA introduced the Additional Behavior Detection Training course (ABDT) as an additional training tool for BDOs. ABDT is a two day class emphasizing non-verbal behavioral detection. This class teaches BDOs how to recognize possible red flags in terms of deception that may manifest itself in micro-expressions and other non-verbal gross motor behavior movements. The main focus is with micro-expression detection during the Casual Conversation portion of the SPOT process. The training also helps direct questions asked of the passenger in order to resolve the situation. The expressions emphasized in the course are universal, meaning that it is culturally independent.

Ideally, the behavior detection capability should be implemented for all TSA staff and especially Transportation Security Officers (TSOs), but cognitive demands of the skill severely limit its applications when personnel have other assigned duties they must concentrate on (e.g. physical screening or threat image recognition). As a result, TSA is seeking training for Micro-Facial recognition for TSOs, a smaller subset of the overall behavior detection capability, which is less cognitively demanding than the entire behavior detection capability that is performed by BDOs. With adequate training, Micro-Facial recognition can be implemented while other screening duties are being performed by TSOs or when other cognitive demands are eased. TSA is also looking to procure additional Micro-Facial training for Behavior Detection Officers to complement initial Micro-Facial training and support recurrent Micro-Facial training requirements.

2. Objective

This initiative will provide BDOs and TSOs with continual on-line training in Micro-Facial expression. The objective of the training is to provide BDOs and TSOs with an additional detection tool that can help identify information indicating a potential security threat through recognition of deceptive behaviors. This information would allow TSOs to target their screening efforts more precisely through more directed searches or by requesting the assistance of a BDO to further understand the anomalous behaviors. Because behavior detection focuses on people rather than threat objects which can and have changed to exploit vulnerabilities in our screening system—the capability will better enable the TSA screening workforce to identify existing and novel security threats introduced by a dynamic, adaptive adversary.

The Micro-Facial training for TSOs is in no way intended to replace or diminish the roll of Behavior Detection Officers. Because of the cognitive demands, TSOs cannot implement the full range of the behavior detection, as in the Screening Passengers by Observation Technique (SPOT) process while performing other screening duties. BDOs, unencumbered by these other screening duties, will continue to have a crucial role in detecting mal-intent by being able to employ the full range of behavior detection tools across a wider scope of security operations.

3. Scope of Work

TSA requires scientifically validated, web-based Micro-Facial recognition training that can be completed in approximately 20-60 minute sessions. Through market research TSA has identified two Commercial- Off-The-Shelf (COTS) products that meet TSA's requirements, will minimize development efforts and significantly reduce Operations and Maintenance (O&M) costs. The two Micro-Facial training products complement one another for training purposes, as one product primarily focuses on frontal facial views, whereas the second product adds profiles views to the frontal views. An additional benefit of using both products is a greater number of images for TSOs/BDOs to view. Although TSA's market research revealed only two vendors which produce Micro Facial training meeting TSA requirements, the contractor is encouraged to offer other potential training solutions if such solutions are discovered. A detailed description of the two suggested products, sub-products and TSA's training requirements are provided in Appendix A.

TSA requires a multi-phased procurement of the Micro-Facial recognition training as described in the following requirements.

Task A: Initial Pilot Phase

The Contractor shall deliver licensing solutions to support 4100 users of the METT-Advanced Online, and 4100 users of the Microexpression Training Course (Original) within 30 business days of award. Once procured, any / all licensing solutions shall be recorded in TSA's name. Licenses shall include any updates and/or revisions made by the vendor(s) to the COTS products for the duration of license agreements. TSA will review each product, perform operational pilot testing for TSOs, and conduct training pilots for BDOs. Results from operational and training pilots will assist TSA in determining which of the following tasks will be awarded.

Each training product shall have the ability to track pass/fail and individual scores. The Contractor shall track training effectiveness based on individual scores and other factors. In addition, the Contractor shall provide summary level pass/fail and score reporting for each pilot group to assist with ascertaining training effectiveness. The contractor shall ensure all participant completion information is entered into TSA's Online Learning Center (OLC). Options include, but are not limited to online (web access) and/or offline (CD/DVD) support during each of the pilots.

Task B: OLC Integration

The Contractor shall support IT testing with the goal to integrate the training products for use on or via TSA's Online Learning Center (OLC). Although hosting web-based training on the OLC is preferred, an interim solution for hosting on a vendor's IT system may be acceptable as long as DHS's privacy and security policies are met. In either case, participants must be able to launch the training via the OLC and all completion/grade data must reside on the OLC. The contractor shall work with training vendors and the TSA OLC team to determine the most efficient and cost effective approach for implementation. The OLC hosting requirement is not necessarily applicable during the TSO and BDO pilot stages, but is preferred.

A Project Management Plan (PMP) shall be prepared by the contractor within 10 business days following the kickoff meeting for Task B. The PMP shall outline the contractor's detailed plans for executing Task B.

Task C: OPTIONAL TSO Training Licenses

Assuming TSO Micro-Facial operational pilots are successful for at least one training product, the next phase of this task order effort is acquiring TSO Training Licenses. The government will decide which of the two training products will be selected. The Contractor shall deliver licensing solutions to support 44,000 additional users. If more than one product is successful during pilot testing, the

contractor shall provide licensing solutions for each successful product. All licenses shall be in TSA's name. Licenses shall include any updates and/or revisions made by the vendor(s) to the COTS products for the duration of license agreements.

Task D: OPTIONAL Curriculum Development for TSO Micro-Facial Training

TSOs will gain a better understanding of the traveling public because they will have the skill to observe and react appropriately to certain situations with individuals based on emotional awareness. In addition, TSOs will use the Micro-Facial recognition skill to determine if additional screening is appropriate for an individual.

TSA will develop policy and operational procedures for TSOs to use the Micro-Facial skill effectively. The contractor shall develop approximately one (1) hour of Interactive Multimedia Instruction (IMI) level 2 curriculum to support TSA policies and operational procedures to meet the following goals;

- Provide training to apply Micro-Facial recognition skills in TSA's operational environment
- Provide training on what to do and not do based upon observation of Micro-Facial expressions (i.e. resolution)

A Project Management Plan shall be prepared by the contractor within 10 business days following Task D kick-off meeting. The PMP will outline the contractor's detailed plans for executing the task.

Task E: OPTIONAL BDO Training Licenses / OLC Integration

The Contractor shall deliver licensing solutions to support 3100 users of the "Frontal, Profile, and ¾ Views (MiX2)" and "MiX2 Additional" training courses within 30 business days of award. All licenses shall be in TSA's name. Licenses shall include any updates and/or revisions made by the vendor(s) to the COTS products for the duration of license agreements.

The Contractor shall integrate the MiX2 and MiX2 Additional training courses for use on or via TSA's Online Learning Center (OLC). Although hosting web-based training on the OLC is preferred, hosting on a vendor's IT system may be acceptable as long as DHS's privacy and security policies are met. In either case, participants must be able to launch the training via the OLC and all completion/grade data must reside on the OLC. The contractor shall work with the training vendors and the TSA OLC team to determine the most efficient and cost effective approach for implementation.

A Project Management Plan (PMP) shall be prepared by the contractor within 10 business days following the kickoff meeting for Task E. The PMP shall outline the contractor's detailed plans for executing Task E.

Task F: Extended Pilot Phase (March 15, 2011 – Aug 15, 2011)

The Contractor shall track training effectiveness based on individual scores and other factors as provided by the vendor data. In addition, the Contractor shall provide summary level pass/fail and score reporting for each pilot group to assist with ascertaining training effectiveness. Training effectiveness tracking is required for all four training products; METT-Advanced, MiX, MiX2, and MiX2 Additional.

The contractor shall ensure all participant completion information is entered into TSA's Online Learning Center (OLC) and also continue managing license assignments for trainees.

4. Quality Assurance

The Contractor shall ensure that all Task Order performance objectives and deliverables are of the highest achievable quality; to promote continuous improvement; and ensure best practices are employed at all times.

5. Government Furnished Equipment, Information, and Property (GFE/GFI/GFP)

- The government will provide applicable Government Furnished Information (GFI) including user information necessary for the provision of training, recording and the reporting of performance feedback. The contractor shall provide GFI Inventory Report to the COTR in the weekly report;
- The government will provide applicable policies and operational procedures once created;
- All GFE shall be tracked and reported in accordance with the requirements of the base contract (HSTS01-09-D-OSO900);
- The Contractor shall utilize Government Furnished Equipment (GFE) for all Tasks within the SOW. These systems shall be configured the same as fielded units operating at the TSA specification for U.S. airports unless otherwise agreed upon by the government;
- The Contractor may be required to purchase equipment if GFE is not available. A separate modification will be issued for these purchases. All contractor acquired equipment subsequently becomes GFE as defined by the terms of the contract;
- TSA will supply property tags in support of this effort. Property records shall be managed by the contractor and provided on a monthly basis to TSA property for bulk upload into the TSA Sunflower system in accordance with TSA Management Directive No 200.57 “Personal Property Management”;

6. IT Requirements

IT Security requirements shall be in accordance with the requirements of the base contract (HSTS01-09-D-OSO900).

The contractor shall comply with the following DHS Enterprise Architecture Compliance Clause.

DHS Enterprise Architecture Compliance

All solutions and services shall meet DHS Enterprise Architecture policies, standards, and procedures. Specifically, the contractor shall comply with the following Homeland Security Enterprise Architecture (HLS EA) requirements:

- All developed solutions and requirements shall be compliant with the HLS EA
- All IT hardware and/or software shall be compliant with the HLS EA Technical Reference Model (TRM) Standards and Products Profile
- Description information for all data assets, information exchanges and data standards, whether adopted or developed, shall be submitted to the Enterprise Data Management Office (EDMO) for review and insertion into the DHS Data Reference Model and Enterprise Architecture Information Repository
- In compliance with OMB mandates, all network hardware shall be IPv6 compatible without modification, upgrade, or replacement

7. Travel (Revised)

The Contractor will be required to support Domestic Travel for this effort to support pilots, meetings with vendors and/or curriculum development requirements defined within this SOW. The government anticipates three (2) trips per month may be necessary and five (5) days in duration (1 trip / 5 days per site). Reimbursement of travel will be in accordance with the Terms and Conditions of the IDIQ Contract. Specific locations are unknown; however, all locations are in CONUS.

8. Deliverables and Schedules

Task A and B Deliverables

Number	Deliverable	Due Date	Recipient	Government Review
1	OTT Weekly Status Report(Electronic)	Every Monday	COTR & Technical Monitor	1 business day
2	Project Kick-off Meeting	Within 5 Business Days of Award	Technical Monitor, OTT Project Lead	N/A

Task F Deliverables

Number	Deliverable	Due Date	Recipient	Government Review
1	OTT Weekly Status Report(Electronic)	Every Monday	COTR & Technical Monitor	1 business day

9. Inspection and Acceptance Criteria

Inspection and acceptance of all deliverables required under this contract will be performed by the Deliverable Recipient specified. All deliverables are due by noon on the day specified, unless otherwise noted by the Government. The Government will review the deliverable and provide the Contractor with notification stating whether the deliverable is acceptable or not within the specified timeframe.
